

THE RIGHT CHOICE

DTX SEPARATOR

We are pleased to announce that we will be able to offer 2 versions of the new DTX Separators by DariTech. The smaller sized version will be introduced at the World Dairy Expo in Madison, Wisconsin. Many have been installed already, including one used for Green Bedding in Ferndale, WA. This is probably the most versatile separator to meet ever changing manure conditions.

It has :

- 1) Built-in by-pass.
- 2) Low maintenance.
- 3) No daily cleaning.
- 4) Large capacity.
- 5) Works for both flush and scrape manure.

THE HAPTIC COW

The Haptic Cow is the most well known of the veterinary haptic simulators. It is a virtual reality cow developed by a veterinarian (Sarah Baillie). After graduation from Bristol Vet School, Sarah worked in a veterinary practice for many years. In 2001, while still working as a vet, she undertook a Masters in Information Technology and then a PHD in the Dept. of Computing Science at the University of Glasgow. The Haptic Cow was developed to help train vet students to palpate a cow reproductive tract, to perform fertility examinations and to diagnose pregnancy. The simulator uses haptic (touch feedback) technology and has a Phantom haptic device from "Sensible Technologies" positioned in a fiberglass model of the rear half of a cow. The Haptic

Cow is being used by several vet schools.

DOING IT RIGHT

Pacific Dairy, thru Jim Peters, had the privilege to go to Guelph, Ontario to attend the first Manure Expo held in Canada. He had a great time seeing all the newest in Manure Spreading and Injection Equipment. The following is a list of the events he participated in:

- ♦ Visited Manure Digester on a 150 cow dairy using an EYS 600HD Separator for bedding.
- ♦ Visited Manure Agitator Demonstration. Of the three makes that were shown, Houle was the most impressive and worked the best.
- ♦ Visited Husky Manufacturing Plant. They have built manure equipment for 50 years.
- ♦ Attended speaker from Puck Manufacturer who talked about Drag Systems.
- ♦ Attended session on Proper Manure Handling - Ways of Saving the Nutrient in the Manure.
- ♦ Attended demonstration in Manure Injecting - Looked at Vienhuis Disc Injection System.
- ♦ Went over safety in manure pits meeting - Blowing air into closed pits importance.
- ♦ Attended Sunova Worx re: Radio Controls for manure equipment.

BABY FORMULA

For Hong Kong customs agents, baby formula is the new heroin. In March this year, a law went into effect limiting the amount of powdered milk travelers

FARMERS FEED CITIES

www.farmersfeedcities.com

can carry out of Hong Kong to two 2 lbs. cans each. Since then, more people have been arrested for smuggling baby formula than were caught all last year with heroin and cocaine. In little over a month, 20,000 lbs. of powdered milk was seized and 879 people were arrested. Why? Because in the last several years, 22 Chinese companies were found to have sold dairy products containing melamine.

Also China's largest milk producer, China Mengniu Dairy, admitted to moldy cattle feed leading to excessive toxin levels in milk. Last year, a large milk producer recalled formula tainted with mercury. The fear and demand has caused scrambling in the worldwide market for milk powder.

Bloomsburg Business Week - May/June

FYI

Three more types of flies: Maggot Flies, Heal Flies & Pink Eye Wet Spot Flies.

THANKS!

Thanks to all of those who came out to PDC's *almost* 20th annual golf tournament. We had a great afternoon with fantastic weather. Congratulations to the top winners:

KP (Closest to the Pin)

- John Kampman

LD (Longest Drive) - Tim Piers
Best Ball Winning Team with a score of 7 under par was Walter, Bruce & Joel Kraakman along with Jim Appeldoorn.

We are already looking forward to next year's tournament!

Top Right: Dewatered solid mat.

Bottom Left: Separated effluent.

Summary of Specs

- Low horsepower operation
- 3" Stainless steel tubular frame construction
- Bearings shielded from manure
- Gearbox made in the U.S.
- Built in bypass system/rock trap
- Direct drive - No belts or chains
- Drive system well out of harms way
- Proven roller press
- No daily cleaning required
- 3/16", 1/8" punched screens available
- Custom installation plans available
